TacticalWalls
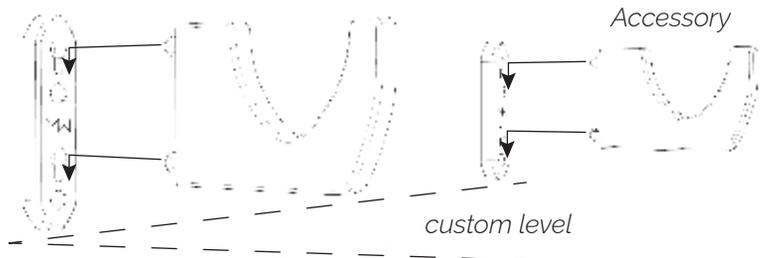

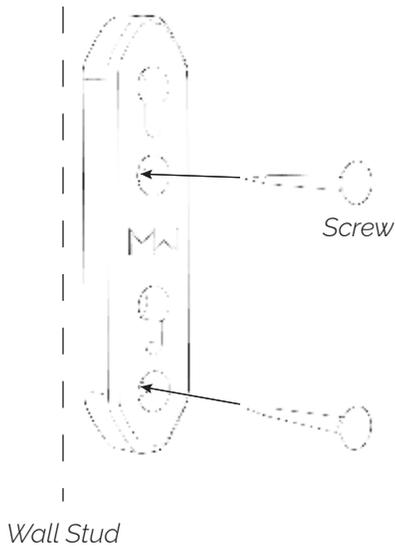

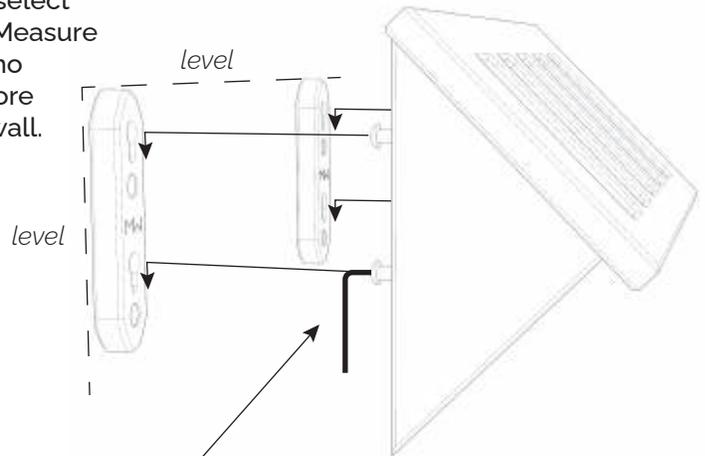

ModWall Nano Mount Installation

Locate wall stud with a studfinder/magnet for your desired mount location and fasten Nano Mount flush to wall with provided drywall screws.
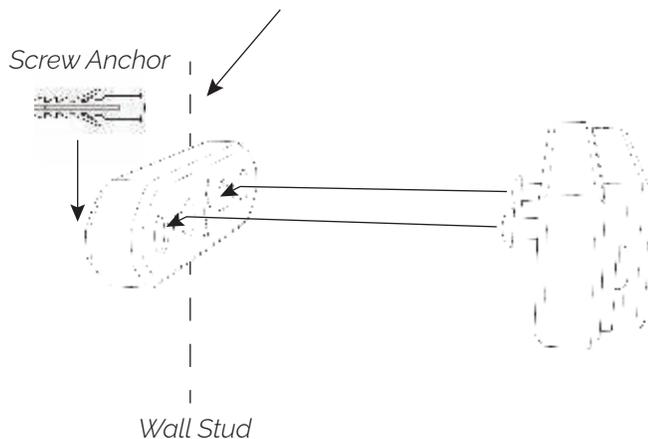

Screw

Wall Stud

Adjust accessory height to the object being mounted for a level appearance by attaching accessories to Nano Mounts and marking desired orientation/position on wall.

Accessory

custom level

Use level for select accessories. Measure and mark Nano locations before fastening to wall.

level

level

For horizontal applications, fasten one side on wall stud and use provided screw anchor to attach screws to drywall side.

Screw Anchor

Wall Stud

All ModWall accessories are compatible with Nano Mounts. With provided hex key, adjust the screws on back of accessories for a snug and secure fit. Tight fitment recommended!

Share your setup with us and the world!
