

VERTICAL RIFLE RACK INSTALLATION

When installing the two-piece Vertical Rifle Rack to a ModWall Panel, be sure to space the Upper Hook and Lower Shelf to fit your rifles' design and most appropriate orientation. Failure to install correctly may lead to firearm damage. Check instructions on back for a visual representation.

Adjust attachment hardware with hex key for snug fitment.

FOR BEST RESULTS

Insure your Vertical Rifle Rack is in contact with the proper areas of your rifle. The Upper Hook must allow the rifle to lean back, which sinks the rifle's stock into the Lower Shelf. Tactical rifles may need to be orientated with the mags facing away from the wall for a secure installation.

Make sure rifle's stock is pushed up against the panel or rifle could fall through Lower Shelf cavity.
